

## TICKETING AND ACCESS CONTROL IN A TOUGH HOUSING

FareGo Gate SG|40 combines the latest ticketing technology and efficient access control in a slim and elegant stainless steel housing.

The door systems of FareGo Gate SG|40 and the optical surveillance of the passage provide hazard-free usage and effective prevention of fraud attempts.

The ticketing unit of FareGo Gate SG|40 has been optimised for high processing speed and user-friendliness allowing a high passenger flow rate.

FareGo Gate SG|40 is available with an extra wide passage providing convenient accessibility for passengers with bulky luggage, wheel chairs or baby buggies.

## FAREGO GATE SG|40

### Passage pictograms

Clearly visible LED pictograms for displaying the allowed pass through direction: direction allowed (green arrow), direction blocked (red cross).

### Customer information display

LC display with dot matrix for displaying user advice and transaction data.

### Magnetic card terminal

Terminal for processing of side and middle stripe cards. The card return slot is located on the top of the gate, so passengers can easily pick up their cards while walking through the gate.

### Smart card terminal

Intelligent smart card reader for processing of smart cards that supports eTicketing applications such as VDV-KA (Germany), ITSO (UK), OV-chipkaart (Netherlands) Calypso and the Scheidt & Bachmann Smart Card Standard.

### Barcode imager

Processes tickets with all conventional 1D and 2D barcodes. The reader has a large scan area and is equipped with high-performance LED target recognition.

### Door panels

The panels are made of 13 mm laminated glass. The glass is lightly tinted for better visibility. When opened the panels completely slide into the housing to ensure unimpeded pass through.
