

FAREGO POINT-OF-SALES

FLEXIBLE SOLUTION FOR PERSONAL TICKET SALES

Additional parts:

- Cash box
- Payment terminals
- 1D/2D barcode scanner
- Thermal printing unit
- Magnetic stripe terminal
- Smart Card Terminal

Scheidt & Bachmann offers a variety of Point-of-Sales solutions (POS) which allows our clients to comprehensively equip their selling points. Thanks to additional periphery, our modular solutions can be perfectly adapted to meet your specific needs.

The basis of our POS systems is provided by either an all-in-one-PC or an industrial computer, which can be equipped with a touch screen. Your individual vending requirements are crucial for selecting the ideal components for your POS solution.

With our classic payment and ticketing solutions as well as our modern eTicketing applications and an optional barcode scanner, Scheidt & Bachmann offers highly function POS equipment for smooth ticket sales.

POINT-OF-SALE-SYSTEMS

FAREGO SALES MP|20

Fare Go Sales MP|20 is an ideal Point-of-Sales solution in smaller retailing locations with limited space. Optionally the compact POS system comes with various ticketing and payment functions:

- Payment: coins, banknotes, debit/credit cards
- 1D/2D barcode scanner for the processing of barcode tickets and static authorisations according to VDV-KA
- Graphic capable thermal printing unit

FAREGO SALES MP|40

FareGo Sales MP|40 is suitable in an environment with higher ticket sales. Ticketing and payment options are:

- Payment: coins, banknotes, debit/credit cards
- 1D/2D barcode scanner for the processing of barcode tickets and static authorisations according to VDV-KA
- Graphic capable thermal printing unit
- Smart Card processing according to ISO 14443 and extensive support of a variety of eTicketing applications
- Magnetic card issuing/processing

FAREGO SALES MP|60

FareGo Sales MP|60 is our high-performance Point-of-Sales terminal for the back office. The modular POS system complies comprehensive ticketing demands. In addition to the features of the MP|40 this system is able to:

- Complete all business processes around the operation of smart cards – which includes the issuance, initialisation, personalisation and photo-identification
- Top up additional products or funds on the smart card
